**SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT** Technology Center 2600

Assistant Commissioner for Patents  
Washington D.C. 20231

Transmitted herewith are Forms PTO/SB/08A and 08B providing material that may be relevant to the subject application. It is respectfully requested that these documents be considered by the Examiner and an initialed copy of the forms be returned to the undersigned. It is believed that this disclosure complies with the requirements of 37 CFR §§ 1.56, 1.97 and 1.98 and the MPEP § 609. If for some reason the Examiner considers otherwise, it is respectfully requested that the undersigned be called so that any deficiencies can be remedied.

Submission of these documents is consistent with the broadest interpretation of the duty of disclosure. In accordance with the rule for patent prosecution, such a submission is not to be construed as an admission that the information cited in the Supplemental Information Disclosure Statement is, or is considered to be, material to patentability as defined in §1.56. Applicant respectfully reserves the right to challenge a conclusion that any of the submitted material represents information constituting prior art to the present application or that the information that applicant has located would be of the type used by one of ordinary skill in the art in solving the problems addressed in the present application. The submission of these materials is consistent with the duty of disclosure and should not be interpreted as an indication that applicant has made a prior art search such that the Examiner should not undertake to conduct an independent prior art search.

Applicant submits material that is listed in an International Search Report for a PCT application corresponding to US Application No. 10/071,007 for Multi-Band Coax Extender for In-Building Digital Communication Systems (Docket number 0960-022). A copy of the Search Report is provided for the convenience of the Examiner.

Please note that the search report references USPN 6,028,860 (Raissinia Alireza et al.). This patent is provided and identified as 6,028,860 Laubach et al. Note that WO 01/76142 is a publication of another PCT application with common assignee and was published October 11, 2001, and after the filing date of the last of the priority applications for the present application. Accordingly, we have not submitted a copy of the PCT application.

Dated: July 10, 2002

Respectfully submitted,

Kevin E. Flynn
